1 Ideas Section (to be removed before any publishing)

What do we need to get across?

- Two important questions that the player and the characters should explore
 - Who am I really / What am I and why?
 - How do I fit into this society and world in which I find myself
- It needs to give the vibes of a cyberpunk setting in flavour as well

What do we want to use?

- Aim to use a hack of the Cortex Prime system
 - because I love the central dice mechanics
 - This requires a choice of the prime sets
- We want to create the vibes of a Vangelis score mixed with some high-octane punk rock
 - Ideally we want to have a healthy balance of decent character moments amidst the fun of bashing those corpo bastards.
- We need to decide on the nature of the setting:
 - Are there synths/replicants/whatever?
 - Are there augs/mods/chrome?
 - How much control over their life does the average person have?
 - And who really holds that power?

Finally, how do we want to present this to players, GMs, and anyone else who happens across this document?

- Sections should start with an Intro
 - First is probably an intro to RPGs (or at least my perspective on them)
 - This should have a basic setting primer
 - Then probably a quick example of the basics of the dice system
 - To finish the Introduction, we should do an intro to the book and how to use it
- Now we need a section on characters and how to build them, just the basics and reference stuff
- Next should be a section which contains **all** the details on how to resolve any rules disparity

- Now, the last things that a player needs to know before they tap out. i.e. a section on the given worldbuilding, and a note to say you may want to make your own...
- So begins the GM section (I need a funny thing for GM to stand for) To start we need to do a GM intro
- Then a quick breakdown on how to structure a session
- Now how to structure a campaign or any extended story
- A bit on how to generate GMPCs or NPCs whatever you want to call them
- A treatise on what Cyberpunk is to me, and what it can be to you...
- Then comes some kind of index, this is going to be fun...

When *ALL OF THIS* is done, we can consider fixing up a nicer visual style
